LEO SURGICAL COMPANY
ISO : 13485:2016 | SSI | MSME | CE CERTIFIED

Serving the Humanity Since 1969

Leo Surgical Company was established by Sh. Kartar Chand Ji in 1969 with Aim to Provide high quality surgical instruments to his customers for better results in medical line. He worked hard on the precision of instruments. Due to his personal involvement in the production he sets new standards in the quality of surgical instruments. He started the company with a low scale production, but due to his hard work, Leo Surgical Company has touched the new heights of success and now is well reknowned brand in surgical line.

In our factory we have been served by highly skilled labourers, and great combination of skilled labourers, latest technology and foresightness of Sh. Kartar Chand Ji, we lay claim to be among the leading manufacturers of surgical instruments in the region.

In this second edition of our catalogue we hope that you will find the great variety of surgical instruments which will cover all the surgeries.

CV7900-23

While bipolar technique is being used, high frequency current flows between the two ends of the bipolar instrument and focuses only on the small surface of tissue placed between them. There is no dangerous flow of current through the patient's body. This minimises the risk of burns in areas that are distant from the surface being operated on. Bipolar techniques are safer than monopolar techniques.

"A" or "V" Pattern?

Throughout the series, the "V" pattern is the all-purpose clamp, commonly used on all veins, and almost all arteries. The "A" pattern, available in all sizes, is designed for exceptionally thick-walled vessels and slippery arteries. The slight incurve of the tips of the "A" pattern jaw provides extra security against slippage.

- Light and compact design
- Extremely durable
- A unique gripping surface
- Smooth sliding bar action on all approximator clamps
- Clamp profile with parallel sided jaws
- Matt or black finish

VISIBILITY BACKGROUND MATERIAL

TO ASSIST IN VISUALISING MICRO VESSELS DURING SURGERY

Application: For use in Micro Surgical Anastomosis of Micro Vessels under a Microscope to allow the surgeon to better visualize the detail of the vessels, being closed.

The Visibility Material can be used either with the Grid side up to give the Surgeon a scale of the vessel alternatively the reverse Plain side can also be used.

The material has a non reflective surface eliminating distractions from theatre lighting and has a non-tacky finish to aid mobilization of the Vessel.

1mm Grid one side & matt finish
on reverse. Size: 50mm x 25mm
